

Climate devices qualifying clinical criteria by device (current medical condition, active in the past 12 months):

Air conditioner

- Pregnant and currently has, has a history of, or is at risk for at least one of the specified clinical conditions detailed in the CMS approved HRSN services protocol
- Child less than 6 years of age and currently has, has a history of, or is at risk for at least one of the specified clinical conditions detailed in the CMS approved HRSN services protocol
- Adult 65 years and older and currently has, has a history of, or is at risk for at least one of the specified clinical conditions detailed in the CMS approved HRSN services protocol
- Bipolar and related disorders
- Major depressive disorder, with an acute care need in the past 12 months including a suicide attempt, crisis services utilization (emergency department, mobile crisis team, etc.), acute psychiatric hospitalization, or residential treatment.
- Schizophrenia spectrum and other psychotic disorders
- One or more of the following substance use disorders: alcohol use disorder, hallucinogen use disorders, inhalant use disorder, opioid use disorder, stimulant use disorder
- Major neurocognitive disorder
- Chronic lower respiratory condition: chronic obstructive pulmonary disease (COPD), asthma requiring regular use of asthma controlling medications, restrictive lung disease, fibrosis, chronic bronchitis, bronchiectasis
- Chronic cardiovascular disease, including cerebrovascular disease and heart disease
- Spinal cord injury

- Any sensory, physical, intellectual, or developmental disability that increases health risks during extreme climate events
- Receiving in-home hospice
- Previous heat-related or cold-related illness requiring urgent or acute care, e.g., emergency room and urgent care visits
- Chronic kidney disease
- Diabetes mellitus, requiring any medication, oral or insulin
- Multiple Sclerosis
- Parkinson's disease

Air filtration device

- Pregnant and currently has, has a history of, or is at risk for at least one of the specified clinical conditions detailed in the CMS approved HRSN services protocol
- Child less than 6 years of age and currently has, has a history of, or is at risk for at least one of the specified clinical conditions detailed in the CMS approved HRSN services protocol
- Adult 65 years and older and currently has, has a history of, or is at risk for at least one of the specified clinical conditions detailed in the CMS approved HRSN services protocol
- Bipolar and related disorders
- Major depressive disorder, with an acute care need in the past 12 months including a suicide attempt, crisis services utilization (emergency department, mobile crisis team, etc.), acute psychiatric hospitalization, or residential treatment.
- Schizophrenia spectrum and other psychotic disorders
- One or more of the following substance use disorders: alcohol use disorder, hallucinogen use disorders, inhalant use disorder, opioid use disorder, stimulant use disorder

- Major neurocognitive disorder
- Chronic lower respiratory condition: chronic obstructive pulmonary disease (COPD), asthma requiring regular use of asthma controlling medications, restrictive lung disease, fibrosis, chronic bronchitis, bronchiectasis
- Chronic cardiovascular disease, including cerebrovascular disease and heart disease
- Spinal cord injury
- Any sensory, physical, intellectual, or developmental disability that increases health risks during extreme climate events
- Receiving in-home hospice
- Home oxygen use: home oxygen, oxygen concentrator, home ventilator

Heater

- Pregnant and currently has, has a history of, or is at risk for at least one of the specified clinical conditions detailed in the CMS approved HRSN services protocol
- Child less than 6 years of age and currently has, has a history of, or is at risk for at least one of the specified clinical conditions detailed in the CMS approved HRSN services protocol
- Adult 65 years and older and currently has, has a history of, or is at risk for at least one of the specified clinical conditions detailed in the CMS approved HRSN services protocol
- Bipolar and related disorders
- Major depressive disorder, with an acute care need in the past 12 months including a suicide attempt, crisis services utilization (emergency department, mobile crisis team, etc.), acute psychiatric hospitalization, or residential treatment.
- Schizophrenia spectrum and other psychotic disorders

- One or more of the following substance use disorders: alcohol use disorder, hallucinogen use disorders, inhalant use disorder, opioid use disorder, stimulant use disorder
- Major neurocognitive disorder
- Chronic lower respiratory condition: chronic obstructive pulmonary disease (COPD), asthma requiring regular use of asthma controlling medications, restrictive lung disease, fibrosis, chronic bronchitis, bronchiectasis
- Chronic cardiovascular disease, including cerebrovascular disease and heart disease
- Spinal cord injury
- Any sensory, physical, intellectual, or developmental disability that increases health risks during extreme climate events
- Receiving in-home hospice
- Previous heat-related or cold-related illness requiring urgent or acute care, e.g., emergency room and urgent care visits
- Chronic kidney disease
- Diabetes mellitus, requiring any medication, oral or insulin
- Multiple Sclerosis
- Parkinson's disease

Mini-refrigeration Unit

- Medications requiring refrigeration. Examples include but are not limited to medications for diabetes mellitus, glaucoma, and asthma; TNF inhibitors
- Enteral or parenteral nutrition

Portable power supply

- Durable medical equipment (DME) requiring electricity for use. Examples include but are not limited to oxygen delivery systems, including concentrators, humidifiers, nebulizers, and ventilators; intermittent positive pressure breathing machines; cardiac devices, in home dialysis and automated peritoneal dialysis; feeding pumps, IV infusions; suction pumps; power wheelchair and scooter; lift systems and electric beds; breast pumps for first 6mo post-partum; other DME medically required for sustaining life.
- Assistive technologies requiring electricity and necessary for communication or ADLs.
